

Animals We Love:

MOUSEDDEER

Recommended for preschoolers

Let's learn more about mousedeer:

1 The lesser mousedeer is among the world's smallest hoofed animals. It weighs only about 2kg.

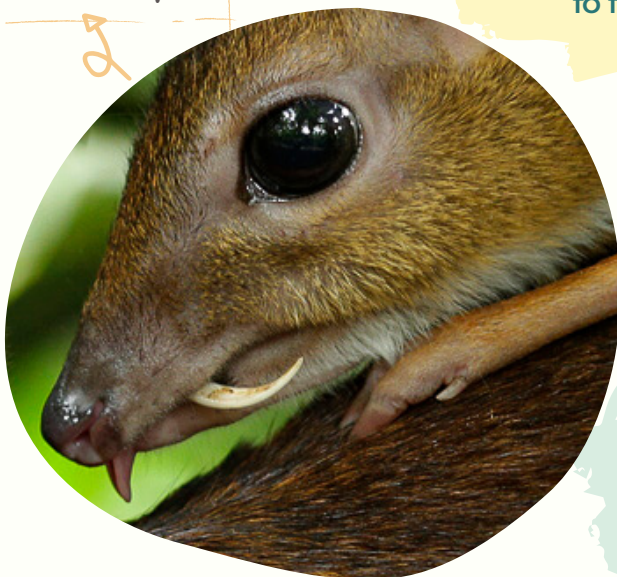

2 Found only in our nature reserves, the lesser mousedeer is listed as critically endangered in Singapore. Its larger cousin, the greater mousedeer, was thought to be extinct in Singapore. In 2006, it was sighted on Pulau Ubin after over 80 years and subsequent studies confirmed its surprising comeback.

3 Male mousedeer have long canines or 'tusks' that protrude from the corners of their mouth. These tusks are used for defence and to fight rival males.

A mousedeer foraging for fallen fruits and fungi on the forest floor.

The 'tusks' of male mousedeer are razor sharp.

4 Mousedeer play an important role in regenerating forests. They feed on fallen fruits and help to disperse the undigested seeds as they move through the forests.

5 Sang Kancil, the mousedeer, is portrayed in Malay folklore as a quick-witted character who always outwits large predators like the crocodile and tiger.

Use the See-Think-Wonder Thinking Routine* to start a conversation with your child

*Adapted from Project Zero, Harvard Graduate School of Education

SEE

- List down all the colours you can see on the mousedeer.
- Use five words to describe the mousedeer in the photograph.
- What can you spot in the habitat of the mousedeer?

THINK

- How do you think a mousedeer protect itself?
- Give the mousedeer a new name. What made you come up with this name?

WONDER

- I wonder where can we find a wild mousedeer in Singapore.

Activity Time!

I Spy... With My Little Eye

1 or more
players

Your sharp
eyesight

STEP 1: Watch the [video](#) on the mousedeer.

STEP 2: Count the number of mousedeer in the entire video.

Hand Printing

At least 1 adult
and 1 child

Washable paint/
watercolours,
paintbrush, drawing
paper and markers

STEP 1: Observe the photograph of the mousedeer. Use a paintbrush to paint your palm with your favourite colour. Spread your fingers open and press your painted palm onto a piece of drawing paper. Leave it to dry.

STEP 2: Look at your dried handprint. Which parts of your handprint resemble the head and the legs of a mousedeer?

STEP 3: Observe the photograph again. Use a marker to add the missing features to your handprint 'mousedeer'.
